

The service supports the information requirements of those responsible for ensuring compliance with environmental legislation and implementing and maintaining environmental management systems, particularly the achievement and maintenance of certification to the ISO 14001 or EMAS standards.

## Who is it for?

The services are designed for environment managers and others given specific environmental responsibilities within organisations, environmental consultants, environmental health practitioners, Local Agenda 21 Co-ordinators in local government (UK and Ireland), environmental NGOs and providers of environmental equipment and services.

## What topics does it cover?

The service covers the full extent of topics required by Environment management professionals including:

- environment management systems
- air quality
- environmental impact assessment
- environmental noise
- effluent and water treatment
- land contamination and remediation
- waste management
- climate change and energy
- water resource management
- control, storage and handling of substances hazardous to the environment
- IPPC (Integrated Pollution Prevention and Control).

## What information sources does it contain?

Our services are comprised of collections of documents from hundreds of publishers. Some of the key publishers included in this service are:

- national (UK and Irish) and EU legislatures
- Environment Agency
- SEPA - Scottish Environment Protection Agency
- Irish Environment Protection Agency
- DEFRA - Department for Environment Food and Rural affairs
- CIRIA
- IEMA - Institute of Environment Management and Assessment
- National Radiological Protection Board
- BSI - British Standards Institution.
